BayView is Improving the Doctor-Patient Experience.

There's no doubt about it. You spend too much time filling out forms and sending faxes. It causes you frustration and delays the process of connecting patients with the Durable Medical Equipment (DME) they desperately need. The system is clunky, outdated and time consuming.

Let Bay View show you a better way.

Reducing or eliminating the daunting amount of time spent on authorization, billing and reimbursement forms frees you up to spend more quality time with your Patients. This improves your life and the lives of your patients!

We know it. We've seen it. By improving the doctor-patient experience, Patient outcome improves significantly.

Drowning in Forms and Faxes? We'll Show You a Better Way.

BAYVIEWHOMECARE.COM

Getting your patients the equipment they need is now easier and faster!

Bay View Homecare's ePrescribing solutions make it simple. Say goodbye to the clunky, fax-based ordering process. Get patients the equipment they need, faster and with less hassle.

Better Experiences for a Better Outcome

Bay View Homecare Value-Based HME

Value-Based HME is a model of healthcare delivery and reimbursement that focuses primarily on the quality of the physician and patient experience. It is a paradigm shift from just offering products and services to improving quality of life!

Bay View is on the leading edge of this shift. We were among the first to implement changes designed to significantly improve the doctor-patient experience. We did this by, reducing traditional burdens like antiquated and complex fax-based paperwork, errors and delays in equipment delivery and set-up, lack of patient education and support. We also switched to ePrescribing and have simplified the entire process of getting patients the equipment they need from beginning to end.

Let Bay View Homecare help make your life easier, so you can have the time to make your patients lives better.

The Benefits of ePrescribing

For Providers and Referrers

- Makes referring patients easier and faster
- Streamlines the insurance approval process
- Reduces the need for fax-based paperwork and forms
- Cost nothing to use
- Provides easy order tracking
- Gives doctors more time with patients

For Patients

- Makes getting them their equipment faster
- Prequalifies them for most insurance
- Ensures that equipment meets their specific needs
- Improves the delivery and setup process
- Improves follow-up and assistance with re-supply

The ePrescribing platforms we use

Parachute Health

Providers, suppliers and health plans all benefit from the visibility, speed and optimal patient care empowered by digital ordering on the Parachute Platform.

CarePort powered by WellSky®

Care Port connects hospitals, post-acute providers and patients to efficiently coordinate and transition patients through different settings of care.

University of Maryland PortfolioMD

Our secure web portal connecting healthcare providers to Epic Portfolio, so they can access patient information when they are treated at a participating UMMS-affiliated hospital or ambulatory location.

DME scripts

DMEscripts simplifies the ordering process so care teams can speed up discharge and ensure patients receive the equipment they need to be healthy, safe, and satisfied.
